

User Guide

This report contains a wide range of useful information about the liver transplant program at VA Pittsburgh Healthcare System. The report has three main sections:

- A. Program Summary
- B. Waiting List Information
- C. Transplant Information

The Program Summary is a one-page summary highlighting characteristics of the program, including the number of candidates on the waiting list, the number of transplants performed at the program, the number of patients being cared for by the program, and patient outcomes, including outcomes while on the waiting list (the transplant rate and the death rate while on the waiting list) and outcomes after transplant (patient and graft survival probabilities). If the program performed transplants in both adults and children, survival probabilities for adults and children (pediatrics) are provided separately. For each of the outcomes measures presented, a comparison is provided showing what would be expected at this program if it were performing as similar programs around the country perform when treating similar patients. More details regarding these outcome measures are provided in Sections B and C of the report.

The Waiting List Information section contains more detailed information on how many candidates are on the waiting list at the program, the types of candidates on the waiting list, how long candidates typically have to wait for a transplant at this program, how frequently candidates successfully receive a transplant, and how often candidates on the waiting list die before receiving a transplant.

Table B1 shows the activity on this program's waiting list during two recent 1-year periods and provides comparisons to all programs within this program's OPTN region (see <http://optn.transplant.hrsa.gov/members/regions.asp> for information on OPTN regions) and the nation as a whole. Tables B2 and B3 describe the candidates on the waiting list at this program, with comparisons to candidates waiting in the same donor service area (OPO/DSA) the OPTN region, and the nation as a whole.

Table B4 shows how many candidates were removed from the waiting list because they received a transplant. The program's transplant rate is calculated as the number of candidates who received a transplant divided by the person-years observed at the program (person-years is a combination of how many candidates were on the waiting list along with how long each candidate was followed since some candidates are not on the waiting list for the entire year). The transplant rate and comparisons to what would be expected at this program are presented in Figures B1 and B2. Figure B1 shows the transplant rate compared to what was expected at this program. The expected transplant rate is an estimate of what we would expect at this program if it were performing transplants at rates similar to other programs in the US with similar candidates on their waiting lists. The expected rate is only an estimate, and is made with a certain level of uncertainty. This uncertainty is shown in Figure B2. Figure B2 displays the ratio of the observed to the expected transplant rate. A ratio of 1 indicates that the observed transplant rate was equal to the expected transplant rate, while a ratio less than 1 indicates the observed rate was lower than expected rate and a ratio greater than 1 indicates the observed rate was higher than the expected rate. However, the level of uncertainty must be considered when interpreting these numbers. The 95% interval is also shown on Figure B2. This interval provides a range within which the true ratio of observed to expected transplant rates is likely to be. If this

User Guide

confidence interval includes (crosses) 1.0, then we cannot say that this program's observed transplant rate is different from what would be expected. The observed transplant rate at this program was 38.3 per 100 person-years. Transplant rates are also provided for adult and pediatric patients separately along with comparisons to adult and pediatric rates in the DSA, the OPTN region, and the nation. Transplant rates are also presented excluding transplants from a living donor (Table B4D and Figures B1D-B3D). Please refer to the PSR Technical Methods documentation available at <http://www.srtr.org> for more detail regarding how expected rates are calculated.

The pre-transplant mortality rate (previously called the waiting list mortality rate) for candidates on the waiting list is presented in Table B5 and Figures B4-B6. These data are presented in the same way as the transplant rate data in the previous section. The intent of this table and figures is to describe risk of death once candidates are listed rather than while they are listed, but before they are transplanted. Therefore, time at risk and deaths after removal from the waiting list for reasons other than transplant, transfer to another transplant program, or recovery (no longer needing a transplant), and before any subsequent transplant, are included. As with transplant rates, mortality rates should be interpreted carefully taking into consideration the interval displayed in Figure B5. For a complete description of how observed and expected mortality rates are calculated, please refer to the technical documentation available at <http://www.srtr.org>.

Survival from listing is presented in Table B6 and Figures B7-B9. These data are presented in the same way as the pre-transplant mortality rate data in the previous section. The intent of this table and figures is to describe risk of death once candidates are listed rather than while they are listed, including after a transplant. As with transplant rates, mortality rates should be interpreted carefully taking into consideration the interval displayed in Figure B8. For a complete description of how observed and expected mortality rates are calculated, please refer to the technical documentation available at <http://www.srtr.org>.

Table B7 presents information on what happens to candidates on the waiting list by three different time points after listing: 6 months, 12 months, and 18 months. The table displays percentages of candidates who have died, been removed from the waiting list, been transplanted, or been transferred or lost-to-follow-up. Tables B8 and B9 provide more detail regarding how many candidates have received a deceased donor transplant by certain time points during the first 3 years after being put on the transplant waiting list. Each row of Tables B8 and B9 presents the percent of candidates who received a deceased donor transplant by each time point. Table B10 presents data on the time it took for different percentages of patients to be transplanted for candidates added to the list between 01/01/2020 and 06/30/2025. The time it took for 5% (the 5th percentile) of patients to receive a transplant at this program was 0.1 months. If "Not Observed" is displayed in the table, then too few candidates received transplants before 12/31/2025 to calculate a particular percentile of transplant times.

Table B11 contains a summary of the offer acceptance practices of the program. The offer acceptance ratio indicates whether the program is more or less likely to accept offers than the average program. If the offer acceptance ratio is greater than 1.0, then the program tends to accept more offers than average; if the offer acceptance ratio is less than 1.0, then the program tends to accept fewer offers than average. Figure B10 shows the distribution of program offer acceptance rates as well as the offer acceptance rate for this program. Figures B11 - B15 similarly show offer acceptance rates for subsets

User Guide

of offers.

The Transplant Information section begins with descriptions of transplant recipients in Tables C1 and C2. Data on recipients of deceased donor transplants are presented (Tables C1D and C2D); if applicable, data on recipients of living donor transplants are presented separately (Tables C1L and C2L). Comparisons to the region and the nation as a whole are provided. A description of the deceased donors used at this program is provided in Table C3D, along with characteristics of living donors in Table C3L, if applicable. Finally, information on the transplant procedure for deceased and living donor transplants is presented in Tables C4D and C4L, respectively.

Starting with Table C5, transplant outcomes are presented along with comparisons to what would be expected at this program and what happened in the nation as a whole. Tables C5-C14 (tables C5-C10 for Pancreas) present information on graft survival (survival of the transplanted organ), with data presented separately for adult and pediatric recipients. Patients are followed from the time of transplant until either failure of the transplanted organ or death, whichever comes first. Please refer to the technical methods for more information on these calculations (<http://www.srtr.org>).

While Tables C5-C14 present data on graft survival, Tables C15-C20 (tables C11-C20 for Pancreas) present information on patient survival. For these tables, patients are followed from the time of transplant until death, regardless of whether the transplant is functioning or the patient required another transplant to survive.

Tables C21 and C22 summarize the multiorgan transplant outcomes at this program. The summary statistics in these tables are descriptive and are not risk-adjusted for different donor and candidate characteristics.

Table D1 shows the rates of follow-up for living donors.

Additional information regarding the technical methods and the risk adjustment models used to estimate expected event rates is available on the SRTR website at <http://www.srtr.org>. We welcome and encourage feedback on these reports. Please feel free to share feedback with the SRTR at the following e-mail: srtr@srtr.org.

A. Program Summary

Figure A1. Waiting list and transplant activity

Table A1. Census of transplant recipients

Recipients	01/01/2024-12/31/2024	01/01/2025-12/31/2025
Transplanted at this center	19	15
Followed by this center*	348	369
...transplanted at this program	344	363
...transplanted elsewhere	4	6

* Recipients followed are transplant recipients for whom the center has submitted a post-transplant follow-up form for a transplant that took place before the 12-month interval for each column.

Figure A2. Transplant rates
01/01/2024 - 12/31/2025

Figure A3. Pre-transplant mortality rates
01/01/2024 - 12/31/2025

Figure A4. First-year adult graft and patient survival: 01/01/2023 - 06/30/2025

Figure A5. First-year pediatric graft and patient survival: 01/01/2023 - 06/30/2025

This center did not perform any transplants relevant to this figure during 01/01/2023-06/30/2025

B. Waiting List Information

Table B1. Waiting list activity summary: 01/01/2024 - 12/31/2025

Waiting List Registrations	Counts for this center		Activity for 01/01/2025 to 12/31/2025 as percent of registrants on waiting list on 01/01/2025		
	01/01/2024- 12/31/2024	01/01/2025- 12/31/2025	This Center (%)	OPTN Region (%)	U.S. (%)
On waiting list at start	41	38	100.0	100.0	100.0
Additions					
New listings at this center	37	42	110.5	117.1	169.4
Removals					
Transferred to another center	0	0	0.0	1.9	1.3
Received living donor transplant*	0	0	0.0	13.5	7.4
Received deceased donor transplant*	19	15	39.5	73.0	121.9
Died	3	3	7.9	9.7	8.6
Transplanted at another center	4	6	15.8	3.2	2.5
Deteriorated	6	3	7.9	7.2	9.1
Recovered	2	1	2.6	9.8	11.5
Other reasons	6	1	2.6	8.7	11.2
On waiting list at end of period	38	51	134.2	90.1	96.1

* These patients were removed from waiting list with removal code indicating transplant; this may not equal the number of transplants performed at this center during the specified period.

B. Waiting List Information

Table B2. Demographic characteristics of waiting list candidates
Candidates registered on the waiting list between 01/01/2025 and 12/31/2025

Demographic Characteristic	New Waiting List Registrations 01/01/2025 to 12/31/2025 (%)			All Waiting List Registrations on 12/31/2025 (%)		
	This Center (N=42)	OPTN Region (N=1,503)	U.S. (N=16,177)	This Center (N=51)	OPTN Region (N=1,156)	U.S. (N=9,175)
All (%)	100.0	100.0	100.0	100.0	100.0	100.0
Ethnicity/Race (%)*						
White	88.1	73.3	64.6	90.2	70.6	61.8
African-American	11.9	11.2	6.9	7.8	12.3	6.9

MELD 31-40	2.4	17.4	13.6	0.0	1.6	1.2
PELD less than or equal to 10	0.0	2.5	1.2	0.0	2.4	1.9
PELD 11-14	0.0	0.3	0.3	0.0	0.3	0.2
PELD 15-20	0.0	0.5	0.4	0.0	0.2	0.3
PELD 21-30	0.0	0.3	0.2	0.0	0.1	0.1
PELD 31 or greater	0.0	0.0	0.1	0.0	0.0	0.0
Temporarily Inactive	0.0	6.5	8.5	0.0	4.9	8.8

* MELD/PELD score based on laboratory measures is shown for listings beginning 2/27/2002 unless patient is Status 1 or Temporarily Inactive. MELD/PELD scores based on exception rules are not used. Status 1 separated into 1A and 1B in August 2005.

B. Waiting List Information

Table B4. Transplant rates: 01/01/2024 - 12/31/2025

Waiting List Registrations	This Center	OPO/DSA	Region	U.S.
All Candidates				
Count on waiting list at start*	41	182	1,371	10,135
Person Years**	88.8	365.8	2,547.6	19,006.5
Removals for Transplant	34	512	2,198	23,801
Adult (18+) Candidates				
Count on waiting list at start*	41	167	1,315	9,731
Person Years**	88.8	329.8	2,413.2	18,177.0
Removals for transplant	34	459	2,047	22,637
Pediatric (<18) Candidates				
Count on waiting list at start*	--	--	--	--
Person Years**	--	--	--	--
Removals for transplant	--	--	--	--

* Counts in this table may be lower than similar counts in other waiting list tables, such as Table B1. A small percentage (~1%) of patients are found to have died or been transplanted before being removed from the waiting list, so these patients are excluded if the event occurs prior to the start of the study period. Inactive time on the waiting list is included in the calculations for this table.

** Person years are calculated as days (converted to fractional years). The number of days from January 1 or from the date of first wait listing until death, transplant, removal from the waiting list or December 31.

Figure B1. Observed and expected transplant rates: 01/01/2024 - 12/31/2025

Figure B2. Transplant rate ratio estimate

Figure B3. Observed adult (18+) and pediatric (<18) transplant rates: 01/01/2024 - 12/31/2025

B. Waiting List Information

Table B4D. Deceased donor transplant rates: 01/01/2024 - 12/31/2025

Waiting List Registrations	This Center	OPO/DSA	Region	U.S.
All Candidates				
Count on waiting list at start*	41	182	1,371	10,135
Person Years**	88.8	365.8	2,547.6	19,006.5
Removals for Transplant	34	333	1,882	22,488
Adult (18+) Candidates				
Count on waiting list at start*	41	167	1,315	9,731
Person Years**	88.8	329.8	2,413.2	18,177.0
Removals for transplant	34	298	1,771	21,541
Pediatric (<18) Candidates				
Count on waiting list at start*	--	--	--	--
Person Years**	--	--	--	--
Removals for transplant	--	--	--	--

* Counts in this table may be lower than similar counts in other waiting list tables, such as Table B1. A small percentage (~1%) of patients are found to have died or been transplanted before being removed from the waiting list, so these patients are excluded if the event occurs prior to the start of the study period. Inactive time on the waiting list is included in the calculations for this table.

** Person years are calculated as days (converted to fractional years). The number of days from January 1 or from the date of first wait listing until death, transplant, removal from the waiting list or December 31.

B. Waiting List Information

Table B6. Rates of patient mortality after listing: 01/01/2024 - 12/31/2025

Waiting List Registrations	This Center	OPO/DSA	Region	U.S.
All Patients				
Count at risk during the evaluation period	245	1,926	8,986	85,845
Person-years*	317.2	2,579.4	12,096.4	115,619.4
Number of Deaths	18	143	753	6,194
Adult (18+) Patients				
Count at risk during the evaluation period	245	1,738	8,390	81,423
Person-years*	317.2	2,316.2	11,268.7	109,420.1
Number of Deaths	18	136	731	6,071
Pediatric (<18) Patients				
Count at risk during the evaluation period	0	188	596	4,422
Person-years*	0.0	263.2	827.7	6,199.3
Number of Deaths	0	7	22	123

* Person-years are calculated as days (converted to fractional years). The number of days from 01/01/2024, or from the date of first wait listing until death, reaching 5 years after listing or December 31, 2025.

** Patient mortality after listing describes the relative survival experience of patients after listing. It depends on many factors, some of which are outside of the control of the transplant program. For example, availability of organs may not be the same in every part of the country.

Figure B7. Observed and expected rates of patient mortality after listing: 01/01/2024 - 12/31/2025

Figure B9. Observed adult (18+) and pediatric (<18) rates of patient mortality after listing: 01/01/2024 - 12/31/2025

Figure B8. HR estimate of patient mortality after listing

B. Waiting List Information

Table B7. Waiting list candidate status after listing
Candidates registered on waiting list between 07/01/2023 and 06/30/2024

Waiting list status (survival status)	This Center (N=40)			U.S. (N=15,116)

* MELD/PELD score based on laboratory measures is shown for listings beginning 2/27/2002 unless patient is Status 1 or Temporarily Inactive. MELD/PELD scores based on exception rules are not used. Status 1 separated into 1A and 1B in August 2005.

B. Waiting List Information

Table B10. Time to transplant for waiting list candidates*

Candidates registered on the waiting list between 01/01/2020 and 06/30/2025

Percentile	Center	Months to Transplant**		U.S.
		OPO/DSA	Region	
5th	0.1	0.1	0.1	0.1
10th	0.2	0.2	0.2	0.2
25th	2.1	0.7	0.5	0.5
50th (median time to transplant)	11.4	3.8	6.1	4.0
75th	Not Observed	24.8	Not Observed	Not Observed

* If cells contain "Not Observed" fewer than that percentile of patients had received a transplant. For example, the 50th percentile of time to transplant is the time when 50% of candidates have received transplants. If waiting times are long, then the 50th percentile may not be observed during the follow-up period for this table. Also, if more than 50% of candidates are removed from the list due to death or other reasons before receiving transplants, then the 50th percentile of time to transplant will not be observed.

** Censored on 12/31/2025. Calculated as the months after listing, during which the corresponding percent of all patients initially listed had received a transplant.

B. Waiting List Information

Table B11. Offer Acceptance Practices: 01/01/2025 - 12/31/2025

Offers Acceptance Characteristics	This Center	OPO/DSA	Region	U.S.

Offer Acceptance Ratio*	0.31	0.60	0.68	1.00
95% Credible Interval**	[0.18, 0.48]	--	--	--
PHS increased infectious risk				
Number of Offers	48	433	3,577	21,582
Number of Acceptances	3	18	120	1,417
Expected Acceptances	5.6	26.5	161.7	1,414.2
Offer Acceptance Ratio*	0.66	0.70	0.75	1.00
95% Credible Interval**	[0.21, 1.35]	--	--	--
DCD donor				
Number of Offers	344	2,102	19,214	143,677
Number of Acceptances	4	59	281	4,151
Expected Acceptances	25.4	112.1	454.1	4,152.2
Offer Acceptance Ratio*	0.22	0.53	0.62	1.00
95% Credible Interval**	[0.08, 0.43]	--	--	--
HCV+ donor				
Number of Offers	27	90	774	6,087
Number of Acceptances	0	1	26	269
Expected Acceptances	0.9	4.4	36.5	269.6
Offer Acceptance Ratio*	0.68	0.47	0.73	1.00
95% Credible Interval**	[0.08, 1.90]	--	--	--
Hard-to-Place Livers (Over 50 Offers)				
Number of Offers	241	1,402	16,533	112,282
Number of Acceptances	0	8	71	1,037
Expected Acceptances	6.6	28.7	188.9	1,220.8
Offer Acceptance Ratio*	0.23	0.33	0.38	0.85
95% Credible Interval**	[0.03, 0.64]	--	--	--
Donor more than 500 miles away				
Number of Offers	33	562	3,186	53,033
Number of Acceptances	1	12	64	1,220
Expected Acceptances	1.6	17.6	90.7	1,091.7
Offer Acceptance Ratio*	0.82	0.71	0.71	1.12
95% Credible Interval**	[0.17, 1.99]	--	--	--

* The offer acceptance ratio estimates the relative offer acceptance practice of VA Pittsburgh Healthcare System compared to the national offer acceptance practice. A ratio above one indicates the program accepts more offers compared to national offer acceptance practices (e.g., an offer acceptance ratio of 1.25 indicates a center accepts 25% more offers than is expected based on national offer acceptance practices), while a ratio below one indicates the program accepts fewer offers compared to national offer acceptance practices (e.g., an offer acceptance ratio of 0.75 indicates a center accepts 25% fewer offers than is expected based on national offer acceptance practices).

** As an example, the 95% Credible Interval for the overall offer acceptance ratio, [0.18, 0.48], indicates the location of PAVA's true offer acceptance ratio with 95% probability. The best estimate is 69% less likely to accept an offer compared to national acceptance behavior, but PAVA's performance could plausibly range from 82% reduced acceptance up to 52% reduced acceptance.

C. Transplant Information

Table C4L. Living donor transplant characteristics

Transplants performed between 01/01/2025 and 12/31/2025

This center did not perform any
transplants relevant to
this table during
01/01/2025-12/31/2025

C. Transplant Information

Table C5. Adult (18+) 1-month survival with a functioning graft
Single organ transplants performed between 01/01/2023 and 06/30/2025
Deaths and retransplants are considered graft failures

	PAVA	U.S.
Number of transplants evaluated	44	24,637
Estimated probability of surviving with a functioning graft at 1 month & [95% CI] (unadjusted for patient and donor characteristics)	95.45% [89.49%-100.00%]	97.29% [97.09%-97.50%]
Expected probability of surviving with a functioning graft at 1 month (adjusted for patient and donor characteristics)	96.81%	--
Number of observed graft failures (including deaths) during the first month after transplant	2	667
Number of expected graft failures (including deaths) during the first month after transplant	1.39	--
Estimated hazard ratio*	1.18	--
95% credible interval for the hazard ratio**	[0.32, 2.58]	--

* The hazard ratio provides an estimate of how VA Pittsburgh Healthcare System's results compare with what was expected based on modeling the transplant outcomes from all U.S. programs. A ratio above 1 indicates higher than expected graft failure rates (e.g., a hazard ratio of 1.5 would indicate 50% higher risk), and a ratio below 1 indicates lower than expected graft failure rates (e.g., a hazard ratio of 0.75 would indicate 25% lower risk). If PAVA's graft failure rate were precisely the expected rate, the estimated hazard ratio would be 1.0.

** The 95% credible interval, [0.32, 2.58], indicates the location of PAVA's true hazard ratio with 95% probability. The best estimate is 18% higher risk of graft failure compared to an average program, but PAVA's performance could plausibly range from 68% reduced risk up to 158% increased risk.

C. Transplant Information

Table C5D. Adult (18+) 1-month survival with a functioning deceased donor graft
Single organ transplants performed between 01/01/2023 and 06/30/2025
Deaths and retransplants are considered graft failures

	PAVA	U.S.
Number of transplants evaluated	44	23,288
Estimated probability of surviving with a functioning graft at 1 month & [95% CI] (unadjusted for patient and donor characteristics)	95.45% [89.49%-100.00%]	97.31% [97.10%-97.52%]
Expected probability of surviving with a functioning graft at 1 month (adjusted for patient and donor characteristics)	96.81%	--
Number of observed graft failures (including deaths) during the first month after transplant	2	626
Number of expected graft failures (including deaths) during the first month after transplant	1.39	--
Estimated hazard ratio*	1.18	--
95% credible interval for the hazard ratio**	[0.32, 2.58]	--

* The hazard ratio provides an estimate of how VA Pittsburgh Healthcare System's results compare with what was expected based on modeling the transplant outcomes from all U.S. programs. A ratio above 1 indicates higher than expected graft failure rates (e.g., a hazard ratio of 1.5 would indicate 50% higher risk), and a ratio below 1 indicates lower than expected graft failure rates (e.g., a hazard ratio of 0.75 would indicate 25% lower risk). If PAVA's graft failure rate were precisely the expected rate, the estimated hazard ratio would be 1.0.

** The 95% credible interval, [0.32, 2.58], indicates the location of PAVA's true hazard ratio with 95% probability. The best estimate is 18% higher risk of graft failure compared to an average program, but PAVA's performance could plausibly range from 68% reduced risk up to 158% increased risk.

C. Transplant Information

Table C15. Adult (18+) 1-month patient survival

Single organ transplants performed between 01/01/2023 and 06/30/2025

Retransplants excluded

	PAVA	U.S.
Number of transplants evaluated	40	23,811
Estimated probability of surviving at 1 month & [95% CI] (unadjusted for patient and donor characteristics)	97.50% [92.78%-100.00%]	98.47% [98.32%-98.63%]
Expected probability of surviving at 1 month (adjusted for patient and donor characteristics)	98.26%	--
Number of observed deaths during the first month after transplant	1	364
Number of expected deaths during the first month after transplant	0.69	--
Estimated hazard ratio*	1.12	--
95% credible interval for the hazard ratio**	[0.23, 2.69]	--

* The hazard ratio provides an estimate of how VA Pittsburgh Healthcare System's results compare with what was expected based on modeling the transplant outcomes from all U.S. programs. A ratio above 1 indicates higher than expected patient death rates (e.g., a hazard ratio of 1.5 would indicate 50% higher risk), and a ratio below 1 indicates lower than expected patient death rates (e.g., a hazard ratio of 0.75 would indicate 25% lower risk). If PAVA's patient death rate were precisely the expected rate, the estimated hazard ratio would be 1.0.

** The 95% credible interval, [0.23, 2.69], indicates the location of PAVA's true hazard ratio with 95% probability. The best estimate is 12% higher risk of patient death compared to an average program, but PAVA's performance could plausibly range from 77% reduced risk up to 169% increased risk.

this table during
07/01/2020-12/31/2022

Figure C31L. Pediatric (<18) 3-year patient death HR estimate (living donor grafts)

This center did not perform any
transplants relevant to
this figure during
07/01/2020-12/31/2022

Figure C32L. Pediatric (<18) 3-year patient death HR program comparison (living donor grafts)

This center did not perform any
transplants relevant to
this figure during
07/01/2020-12/31/2022

C. Transplant Information

Table C21. Multi-organ transplant graft survival: 01/01/2023 - 06/30/2025

Adult (18+) Transplants

Transplant Type	First-Year Outcomes					
	Transplants Performed		Liver Graft Failures		Estimated Liver Graft Survival	
	PAVA-TX1	USA	PAVA-TX1	USA	PAVA-TX1	USA
Kidney-Liver	4	1,984	1	186	75.0%	90.6%

Pediatric (<18) Transplants

No pediatric (<18) multi-organ transplants were performed

Table C22. Multi-organ transplant patient survival: 01/01/2023 - 06/30/2025

Adult (18+) Transplants

Transplant Type	First-Year Outcomes					
	Transplants Performed		Patient Deaths		Estimated Patient Survival	
	PAVA-TX1	USA	PAVA-TX1	USA	PAVA-TX1	USA
Kidney-Liver	4	1,984	1	175	75.0%	91.2%

Pediatric (<18) Transplants

No pediatric (<18) multi-organ transplants were performed

D. Living Donor Information

Table D1. Living donor summary: 01/01/2023 - 12/31/2025

Living Donor Follow-Up	This Center			United States		
	01/2023- 12/2023	01/2024- 12/2024	01/2025- 06/2025	01/2023- 12/2023	01/2024- 12/2024	01/2025- 06/2025
